

# Productive Resources

**Human Resources** - people working to produce goods and services (farmers, builders, firefighter, doctors, painters)

**Human Capital** - the health, education, experience, training, skills and values of people. Also known as human resources.

**Capital Resources** - goods made by people and used to produce other goods and services (hammers, computers, trucks, lawn mowers, factory buildings, machines, tools)

**For Discussion:**

- What does the human resource in the illustration below do?
- What capital resources is he using?
- What skills must a person have to do this job?
- What skills must a person have to do what is seen in the visual?

**Hint:** An easy way to remember what a capital resource is to think of it as a **cap-i-TOOL** resource.
